goalkeep

BRAND & DESIGN GUIDELINES

Goalkeep ***design system.***

Typography, colour, shape, patterns and motion, taken from the shipped homepage (v5.0).
Formal first, human second.

01 · Brand character & logo	2
02 · Colour	3
03 · Typography	5
04 · Shape, depth & buttons	7
05 · Patterns & brand devices	8
06 · Layout, motion & icons	9
07 · Do / don't	10

Source of truth: **src/styles/tokens.css** · **src/styles.css**. Reference the token, never the hex.

01 · BRAND CHARACTER

Goalkeep's work decides whether a nonprofit gets funded. ***The page has to read like that.***

FORMAL STRUCTURE

Navy and white grounds, rectangular buttons, one quiet surface treatment, restrained heading weights.

A HUMAN HAND ON TOP

Handwriting (Caveat), a real highlighter stroke and hand-drawn circles. These are the three things the client explicitly liked.

NEVER

"Young media agency": full-chroma colour, black outlines, hard offset shadows, pill buttons, bouncy hovers, boxed photos.

LOGO

ASSET	FILE	USE
Wordmark, dark letters	`public/wordmark-ink.webp` (673×160)	Light grounds
Wordmark, white letters	`public/wordmark-white.webp`	Navy grounds
Icon (the g ring)	`public/goalkeep-icon.png`	Favicon, app icon, share card

- Header size: 32px tall, 36px from tablet up. The ring keeps its colours in both versions; only the letters change.
- The mark is a **closed ring of five round-capped arcs** plus a smile beneath. Stroke is 13.8% of the diameter; spans 71.5° / 68° / 71° / 77.5° / 72°.

Mark colours: for drawing the logo only, never UI accents

Mark yellow
#E8E724

Mark ink
#3F3D3D · white on dark

Mark blue
#526EB5

Mark teal
#79C2B4

Mark coral
#EE9D90

02 · COLOUR

Navy and white carry the page. ***Everything else is a highlight.***

Grounds & ink

Navy
--gk-navy · #2F4A92
Hero, proof, closing

Navy deep
--gk-navy-deep · #1E3266
Pressed, primary hover

Navy lift
--gk-navy-lift · #3D5AA8
Raised off navy, hero arcs

Ink
--gk-ink · #14131A
The only dark text colour

White
--gk-white · #FFFFFF
Cards

Cream
--gk-cream · #FCFCFD
Light page ground

Cream deep
--gk-cream-deep · #F1F4FA
Pale-blue highlight band

Beige
--gk-beige · #F7F5EF
"Why we exist", sector label

Accent hues, muted off full chroma

	BASE	DEEP · HOVER	INK · SMALL TEXT	TINT · WASH	LIFT · ON NAVY
Blue	#3F63C8	#2F4D9F	use deep	#EAEFF9	#8FA8E8
Teal	#2F9C8F	#237A70	#176059	#E7F2F0	#5FC9BA
Coral	#E07A5F	#C8613F	#9C452A	#FBEEE9	#F0A58C
Gold	#EAC452	#CFA72F	#7D5E0C	#FBF3DF	n/a

Tokens follow `--gk-{hue}`, `-deep`, `-ink`, `-tint`, `-lift`. Lift values exist because muted teal and coral drop to ~2.5:1 on navy.

Hand marks & highlighter

Scribble
--gk-scribble · #F6D83A · every hand mark

Highlight
--gk-highlight · #FCF0A5 · marker body

Highlight end
--gk-highlight-end · #F7DB63 · darker ends

02 · COLOUR

Semantic tokens

TOKEN	VALUE	USE
`--fg-1`	ink #14131A	All text on light
`--fg-2`	rgb(20 19 26 / 0.72)	Secondary text: an alpha of ink, never a grey
`--fg-inverse` / `--fg-inverse-2`	white / white 76%	Text on navy
`--bg-page · card · sunken · inverse`	cream · white · cream-deep · navy	
`--hairline`	#E5E7EE	1px borders on white
`--hairline-strong`	#D3D7E2	Dividers that must be read, hover borders
`--hairline-inverse`	rgb(255 255 255 / 0.16)	Borders on navy

Grounds & band accents

Each section picks **one ground class and one accent class**. Components read `--band-*` variables and never name a hue.

.GROUND-NAVY

White text

Secondary at 76%

Gold links

.GROUND-CREAM

Ink text

Secondary at 72%

Blue-deep links

.GROUND-CREAM-DEEP

Ink text

The pale-blue highlight band

Blue-deep links

Accent classes `.accent-blue` `.accent-teal` `.accent-coral` `.accent-yellow` set `--band-accent`, `-accent-deep`, `-accent-ink` and `--band-tint`. On navy the accent ink switches to a light value (blue becomes gold).

Colour rules, enforced by `pnpm check:design`

1. No grey text. Text is ink or white; anything softer is an alpha of one of those two.

2. Navy and white are the grounds. Tints are occasional highlight bands, not a third ground.

3. Gold is a marker, never text on a light ground (hard-banned).

4. Pop teal and coral are display colours on white. On navy use `-lift`; pop versions under 24px are banned.

5. Any opaque colour not in the token list fails `check-palette.mjs`. No stray Tailwind defaults.

6. Focus: blue 3px halo on light, gold halo on navy. Text selection is gold behind ink.

03 · TYPOGRAPHY

Two families. ***Weight, italics and the hand do the rest.***

PRIMARY: EVERYTHING

Nunito Sans

Aa Bb Cc 0123456789 *Italic* **ExtraBold**

Variable 200–1000, with italics. Display, headings, body, labels, buttons. Fallback: ui-sans-serif, system-ui.

SECONDARY: THE HAND

Caveat

notes in the margin, asides

Variable 400–700. Marginalia and highlight moments only. Fallback: "Bradley Hand", cursive.

Type roles

.display / h1 clamp(34–56px) · 500 · lh 1.06 · –0.02em	Use data to ***scale impact.***
.h2 clamp(28–42px) · 400 · lh 1.16 · –0.02em	Short on data? ***Short on decisions.***
.h3 22px · 700 · lh 1.28	**Impact and measurement strategy**
.lead 19px · 400 · lh 1.6	We work with nonprofits, funders, and ecosystem partners.
Body 17px · 400 · lh 1.65	Paragraph text on any light ground stays in ink, never a tint or grey.
.eyebrow 13px · 700 · caps · +0.09em · 24×2px rule	WHAT WE DO
.hand / .hand-lg Caveat 24px · 600 / 24–32px · 700	this is where it changed
.stat-figure 800 · tabular · –0.03em · lh 1	**120+**
.chip / button 15px · 700	Education Health

Size scale

TOKEN	REM	PX
--fs-xs	0.8125	13
--fs-sm	0.9375	15
--fs-base	1.0625	17 (body)
--fs-lg	1.1875	19
--fs-xl	1.375	22
--fs-2xl	1.75	28
--fs-3xl	2.25	36
--fs-4xl	2.875	46
--fs-5xl	3.5	56
--fs-hand-sm / hand / hand-lg	1.25 / 1.5 / 2	20 / 24 / 32

Weight, leading, tracking

WEIGHT	VALUE
Regular	400
Medium	500
Semibold	600
Bold	700
ExtraBold (ceiling)	800, never 900

PROPERTY	DISPLAY	HEADING	BODY / LABEL
Line-height	1.06	1.16	1.65
Tracking	−0.02em	−0.012em	label +0.09em

The headline pattern

> India's social sector isn't short on data. ***It's short on decisions made with data.***

Headings are set **light**. Only the phrase that carries the sentence is ***bold italic*** (`<em>` renders as italic 800). Emphasis is never a colour and never a second, lighter line.

Copy formatting

- **Sentence case everywhere**: headings, buttons, nav. Eyebrows are written lowercase in content and uppercased by CSS.
- Line lengths: hero lead 46ch, headings 22–36ch. Headings use `text-wrap: balance`.
- Hyphenated words never break across lines.
- Paragraph body on any light ground is ink. "Just keep it in black."

04 · SHAPE, DEPTH & BUTTONS

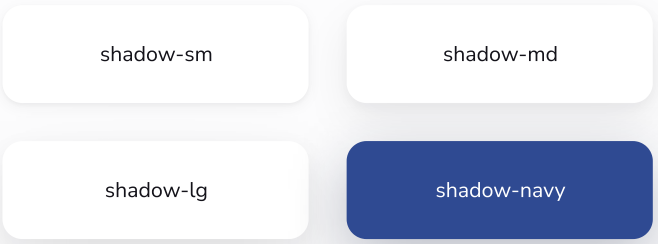

One surface treatment. ***No black borders, ever.***

Radius

`--r-btn / --r-sm` 4px	Buttons, chips, tabs, focus ring
`--r-md` 8px	Inputs
`--r-lg` 12px	Cards and surfaces
`--r-xl` 16px	Large panels
`--r-pill`	Round icon buttons only

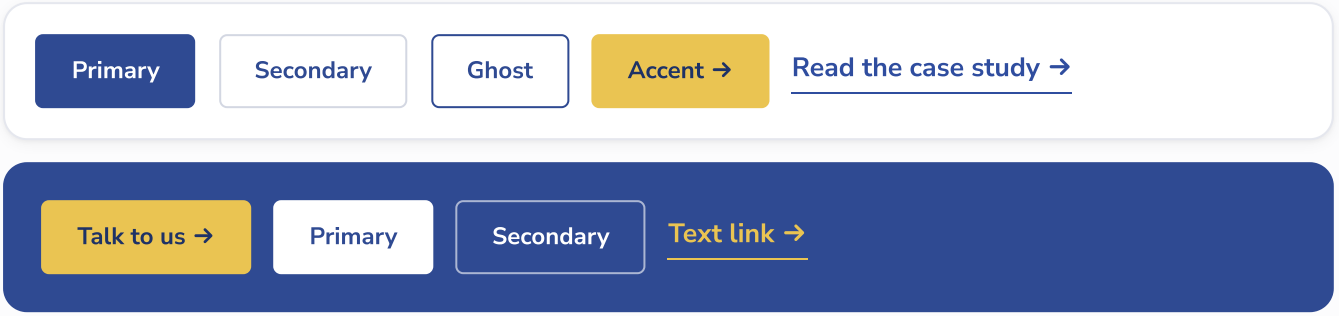

Shadows: soft neutral drops only

.surface: white, 1px `--hairline`, 12px radius, `--shadow-sm`. **.card-lift** on hover rises 4px, takes `--shadow-lg` and `--hairline-strong`. **.surface-inverse** on navy: white 6% fill with a 16% white hairline.

Buttons

Rectangles with a 4px radius and a flat fill. **Hover is a colour step only**: nothing moves, overshoots or follows the pointer. The optional arrow nudges 3px.

VARIANT	ON LIGHT	ON NAVY
primary	Navy fill, white text; hover navy-deep	White fill, navy text; hover cream-deep
secondary	White, navy text, hairline-strong border; hover navy border	Transparent, white text, white 60% border
ghost	Navy outline; hover navy fill	White 40% outline
accent	Gold fill, navy-deep text; hover gold-deep	Gold fill; hover white
tertiary	Text link: bold, 1.5px underline, gap widens 8 to 12px on hover	

Spec: 15px · 700 · sentence case · padding 20px × 11px · lucide ArrowRight, stroke 2.25.

The hand, the highlighter ***and the arcs of the mark.***

THE HIGHLIGHTER · .MARKER

turn data into decisions

we design, build and enable

1. **Chisel ends**: CSS skewX(±4°).
2. **Wobbling edges**: an SVG mask on a ::before.
3. **Uneven ink**: darker ends, ink settling at the bottom.
4. **A degree off level**: rotate(−0.4°) or 0.3° (.marker-b).

The stroke overshoots the word. Use white with navy text on dark grounds, and split wrapped prose into one stroke per line.

HAND-DRAWN MARKS · <SCRIBBLE>

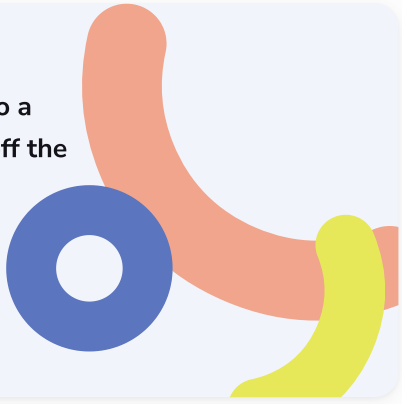

Circle, oval, ring, underline (×4 kinds), squiggle, arrows, bracket, star, spiral, check, zigzag, cross.

- Always **--gk-scribble** yellow. Round caps, 4–7px weight.
- **Deliberately imperfect**: circles don't close, underlines wobble.
- Draw in once on scroll (0.9s). *Margin notes* sit at −3° with an arrow.

Logo-arc shapes · <ArcPiece>, <ShapeField>

EXAMPLE

Large, anchored to a corner, bleeding off the edge.

- Every shape is **an arc of the logo ring**. Sweep 360 is the ring, 180 the half, ~80–100 the "comma". Nothing generic.
- **Large** (200–440px), stroke tuned to about 48px, anchored to a corner and running off it, never over text.
- The visible part must show curvature and at least one round cap, or it reads as a blob.
- **At most one coloured piece per light band**; two tonal navy-lift pieces on the hero.
- Drifts gently against scroll. Hidden on phones.
- Closing band: the mark's five arcs start scattered and **assemble on scroll**. This is the only place the whole mark is built from its parts.

Photography & light

- Goalkeep's own photography only (see `public/photos/CREDITS.md`).
- **Never framed in a box.** Photos dissolve into the ground with five-stop mask fades (`.dissolve-r / -l / -b / -rb / -soft`, `.photo-bleed`).
- Fade the photograph only, never drawn illustration. Card images run flush to the card edge.
- Partner logos are greyscale and take colour on hover, in a ticker that fades out 210px from each side.
- Hero only: a faint pointer glow and a rim light on the case card. Light only; nothing moves, scales or tilts.

Light, then dark. ***An alternating rhythm.***

Homepage band order

1	**Hero**	Navy, flat, gold accent
2	**Partners**	White
3	**Why we exist**	Beige
4	**What we do**	White
5	**Whom we do it for**	Tint per audience
6	**Our approach**	White
7	**Proof**	Navy over photography
8	**Case studies**	White
9	**FAQs**	Yellow tint, no surfaces
10	**Closing**	Navy, mark assembles
11	**Contact**	White, form

Spacing (4pt scale)

--sp-1 to --sp-10: 4 · 8 · 12 · 16 · 24 · 32 · 48 · 64 · 96 · 128px

.shell	Max 1320px. Side padding 16px, 48px at ≥768, 64px at ≥1280
.band	Vertical padding 64px, 96px at ≥768
Grid	12 columns at lg; hero splits 7 / 5
Section head	Eyebrow, 16px gap, h2, then content

Motion

`--ease-out`	cubic-bezier(0.22, 1, 0.36, 1): all chrome
`--ease-pop`	(0.34, 1.4, 0.64, 1): process animations only
Durations	140ms links · 240ms buttons, cards · 520ms marker · 900ms scribbles

- Nothing overshoots on hover. Scroll reveals play once, only when in view.
- **Reduced motion**: everything resolves to its final state (typed line shown whole, marks drawn, carousels static).

Icons

lucide-react, stroke 2 to 2.25, sized in em. Round icon buttons are 44px with a 1px white 40% border on navy.

07 · DO / DON'T

A middle ground: ***formal structure, a human hand.***

DO	DON'T
Navy and white grounds, tints as occasional highlights	Full-chroma fills, a third "brand colour" ground
Light headings with one bold-italic phrase	900 weight, colour as emphasis, all-caps headlines
Nunito Sans and Caveat	Any third typeface
1px hairline and a soft drop shadow	Black borders, hard offset shadows
4px rectangular buttons with a colour-step hover	Pills, press-in shadows, bounce, magnetic pull
Photos dissolving into the ground	Photos in frames or boxes
Logo-arc shapes: large, in a corner, bleeding off	Random circles floating mid-band
Yellow highlighter and hand marks for emphasis	Flat rectangles of colour behind text
Ink or white text, alphas for softness	Grey text tokens
Sentence case	Title Case Buttons, uppercase headings
